

V-3TP

STAINLESS STEEL BALL VALVE WITH MOUNTING PAD

GENERAL FEATURES

The essential element in the ball valve is a ball which has a hole in the middle. This ball's 90° turn move it from fully opened to closed position. The ball valves are primarily used in places where it is necessary to open and close a lot or to open and close quickly.

The advantages are low pressure losses, easy opening and closing, good sealing, light weight and low space occupancy. Sealing; It is made up of two stages as a sphere seal and a shaft seal.

Ayvaz V-3TP Actuator Pluggable Three-Piece Stainless Steel Ball Valves are subjected to 100% air test in open and closed positions under 10 bar. Actuator can be easily installed on these valve types.

Material Structure

Body: AISI316 / AISI304 Stainless Steel
Ball: AISI316 / AISI304 Stainless Steel

Connection:
Threaded

Nominal Diameter:
DN15 (1/2") - DN100 (4")

Pressure Range:
Max. 40 bar

Temperature Range:
Based on material -25°C to 180°C

Application Areas:

- Heating-cooling lines
- Food facilities
- Chemical industry
- Shipbuilding
- Paper mills

Installation:

Installation can be done in every position.
