Puffere - Rezervoare de acumulare agent termic

INSTRUCȚIUNI PENTRU UTILIZARE, INSTALARE ȘI UTILIZARE

Introducere

Stimate client,

Speram ca echipamentul pe care l-ati cumparat de la noi va contribui la confortul casei si la reducerea cheltuielilor de energie. Acest manual de utilizare cuprinde descrierea tehnica a unitatii pe care ati cumparat-o si instructiunile de functionare. Manualul a fost intocmit pentru a va familiariza cu instalarea, operarea si intretinerea acestuia.

Respectarea instructiunilor din acest manual este una din conditiile garantiei.

Avantaje:

1. Pufferul este utilizat in instalatii de incalzire pentru stocarea de agent termic. Acesta protejeaza functionarea cazanului si maresta considerabil durata de viata a acestuia.
2. Pufferul este fabricat din otel de inalta calitate S235JR (EN 10025).
3. Presiunea de lucru a rezervorului de acumulare este de 3 bari.
4. Izolatia exterioara este realizata din poliuretan moale 100 mm grosime cu invelis din PVC, in conformitate cu DIN 4753-8.

1. Izolatie

Puferele cu capacitate intre 150 si 5000 litri sunt izolate cu spuma poliuretan moale 100 mm grosime rezistente la temperatura cu densitate de 23 kg / m². Invelisul decorativ al pufferelor este din folie de PVC moale, in diverse culori.

Figura 1
Vedere microscopica a poliuretanului

2. Schema de conectare a supapei rezervorului de acumulare (Puffer)

3. Rezistenta electrica (optional)

Optional urmatoarele rezistente electrice pot fi conectate la puffer:

- 1) 3000W / 230V
- 2) 4500W / 230V
- 3) 6000W / 230V
- 4) 7500W / 400V

Acestea au termostate de protectie cu dubla siguranta cu intervalul de temperatura de la 30 ° C pana la 80 ° C. Temperatura de declansare 95 ° C; 3 +2 contacte 10 (2.5) 230V , protectie IP 40 ; diferential 8 ° C ± 3 ° C.

Putere (W)	L (mm)	Conectare	Voltaaj (V)
3000	210	1½"	230/400
4500	320	1½"	230/400
6000	410	1½"	230/400
7500	590	1½"	230/400

Conectarea elementul electric de incalzire la sursa de energie electrica trebuie sa fie facuta de electricieni specializati. Cand conectati elementul de incalzire la reseaua electrica, asigurati-va ca aceasta are impamantare.

4. Termometru (optional)

Figura 3

5. Termostat (optional)

Figura 4

Acesta este un termostat dublu reglabil care este conceput sa regleze temperatura apei si sa asigure o toleranta de siguranta; acesta poate fi reglat manual (modelul TLSC) sau automat (TLSC/A model).

STANDARDE DE CONFORMITATE

Acest produs este in conformitate cu:

- EN 60730 - 1 editiile ulterioare;
- EN 60730 - 2 - 9

CONFORMITATE CU REGLEMENTARILE

Acest produs este conform cu:

- Directiva de joasa tensiune 73/23 CEE
- Directiva privind compatibilitatea electromagnetica 89/336/EC

CARACTERISTICI TEHNICE

Gama temperatura - reglare: 0 ° C ÷ 90 ° C, limita: 90°C÷110°C

Toleranta - reglare: ± 5K , limita - 15k ; - 6k (depinde de model)

Diferenta de temperatura - reglare: 6 ± 2K, 4 ± 1K (depinde de model), limita de 25 ± 8K, 15 ± 8k (depinde de model)

Reglaj automat (TLSC/A) si manual (TLSC).

Grad de protectie IP = 40 .

Clasa de izolatie = I.

Rata schimbări de temperatura ≤ 1K/min .

Punct Temperatura maxima = 80 ° C.

Temperatura maxima lampa electrica = 125 ° C

Temperatura acumulare = 15 ° C ÷ 55 ° C.

Presiunea maxima a cartusului = 10 bari.

Constanta de timp ≤ 1 " ; .

Figura 5.1

Conexiune electrica:

C-1 ADJ.: 10(2,5)A/250V~;
C-2 ADJ.: 6(2,5)A/250V~;
C-1 LIM.: 0,5A/250V~;
C2 LIM.: 10(2,5)A/250V~;

Terminal - intrerupator de circuit sau contact de pornire.
Comutator - actiune - 2B .
Locul de instalare - NORMAL.
Tip de cablu - M20 x 1,5.

INSTALARE SI CONECTARE

Instructiuni de siguranta:

Inainte de a conecta termostatul, fiti siguri ca UNITATEA NU ESTE CONECTATA LA RETEAUA DE ALIMENTARE CU ENERGIE.

Figura 5.2

ATENTIE! Toate operatiunile de instalare, inclusiv ajustarile manuale, trebuie sa fie indeplinite de catre un specialist calificat.

Figura 5.3

Figura 5.4

A) Vezi Figura 5.3 si 5.4;

B) Desfaceti cele trei suruburi si scoateti partea frontala a termostatlui. Se desfac firele de alimentare si se conecteaza la bornele termostatlui (figura 5.5) urmand instructiunile.

Figura 5.5

Figura 5.6

NOTA: Vezi Figura 5.6.

Pentru a inchide partea din fata, deschiderea cartusului trebuie sa se alinieze cu cuplarea butonului de reglare .

Figura 5.7

Figura 5.8

LIMITAREA CONEXIUNILOR

TERMINAL 2 – deschide circuitul cand temperatura creste.
TERMINAL C – contact obisnuit.

TERMOSTAT

TERMINAL 1 – deschide circuitul cand temperatura creste.
TERMINAL 2 – inchide circuitul atunci cand temperatura creste
TERMINAL C – contact obisnuit

REGLAREA TEMPERATURII

A - buton de Reset (numai pentru TLSC)
B - Buton pentru reglarea temperaturii

8. Transport si ambalare

Pufferele pot fi cu sau fara izolatie.

Ele sunt securizate pe un palet. Ambalate cu folie .

Toate modelele pana la 2500 de litri sunt fixate pe un palet in pozitie verticala.

Puffer	Dimensiuni palet (fara izolatie)	Dimensiuni palet (cu izolatie)
FB 200	550x550	-
FB 300	550x550	-
FB 500	650x650	900x900
FB 800	790x790	1050x1050
FB 1000	790x790	1050x1050
FB 1500	1000x1000	1250x1250
FB 2000	1150x1150	1400x1400
FB 2500	1150x1150	1400x1400

Toate modelele mai mari de 3000 de litri sunt fixate pe un palet in pozitie orizontala.

Puffer	Dimensiuni palet (fara izolatie)	Dimensiuni (palet cu izolatie)
FB 3000 d=1250	650x650	900x900
FB 3000 d=1400	790x790	1050x1050
P 5000	790x790	1050x1050

Izolatie, capacul decorativ si rozetele poate fi livrate separat.

Avantaje:

- Transport facil (ocupa mai putin spatiu la transport).
- Manevrare usoara la locul de instalare.
- Ambalare usoara si rapida a pufferului cu izolatie moale. Toate deschiderile necesare in carcasa din poliuretan moale sunt realizate in prealabil, iar instalatorul trebuie doar sa le gaseasca si sa le scoata.

Carcasa este fixata printr-un fermoar la platforma de asamblare.

9. Reciclare si eliminarea deseurilor

La sfarsitul ciclului de viata al fiecarui produs componentele sale urmeaza sa fie eliminate in conformitate cu prescriptiile de reglementare.

Echipamentele inechite trebuie sa fie colectate separat de alte deseuri reciclabile care contin materiale cu efect negativ asupra sanatatii si mediului.

Parti metalice, precum si cele non - metalice vor fi vandute la centre reciclabile licentiate de metal sau organizatiilor de colectare a deseurilor non-metalice . Acestea nu ar trebui sa fie tratate ca deseuri menajere.
