

ASTRALPOOL 

Ultra 250

Robotic pool cleaner

**The most compact
robot for public
swimming pools**

- ▶ 3 cleaning cycles
- ▶ Cleans the bottom, walls and water line
- ▶ Easy to use: new intuitive power supply with different options
- ▶ For pools up to 25 m
- ▶ Plug&Play

Ultra 250

Robotic pool cleaner

Features

- The **most versatile, compact** pool cleaner in the market for **community and public swimming pools up to 25 m** (hotels, universities, schools, rehabilitation centres, clubs, gyms, etc.).
- **3 cleaning cycles:**
 - 3h (bottom)
 - 4h (bottom, walls and water line)
 - 5h (bottom, walls and water line)
- **New intuitive power supply** with different options:
 - Cleaning cycle delay (2h): the dirt is allowed to settle before the robot starts cleaning.
 - Full filter LED alarm.
 - Cleaning level selection: rough, regular, fine.
 - Cleaning cycle selection.
 - Optimisation of cleaning by selecting the pool shape.
 - Electronic swivel.
 - Obstacle detection.
- **Oil cooled** pump motor independent from the drive motors.
- Robust drive system.
- The **remote control** allows directing manually the robot to clean any zone.

Technical specifications

Speed	16 m/min
Surface	400 m ² /h
Cleaning cycles	3/4/5 h with automatic shut off (3h cleans the floor only)
Suction flow	16,4 m ³ /h
Filter	Reusable bag with a capacity of 7,750 cm ²
Motors	
Power consumption	120 W
Voltage	24 V DC
Current	5 A
Power supply	
Capacity	180 W
Input	100-259 V / 50-60 Hz
Output	30 V / DC
Cable length	30 metres
